SUMMARY

I'm a passionate Software Engineer with 3+ years of experience specializing in client-side front-end development. With a strong sense of ownership and attention to detail, I am dedicated to delivering high-quality, responsive, and user-friendly web applications. My expertise lies in building intuitive interfaces that meet both user needs and business goals, ensuring performance, scalability, and maintainability in every project.

EXPERIENCE

Kreeyaa Technologies (Qualifyde).....
Senior Software Engineer Nov 2024 – Present, Hyderabad, India

- Spearheaded the development of the client-side architecture from the ground up, ensuring scalability and performance optimization.
- Led a team of developers, fostering a collaborative environment and providing hands-on training to enhance their technical and professional skills.
- Collaborated closely with business and sales teams to design and deliver innovative, customer-centric solutions that drive revenue and client satisfaction.
- Contributed to the development of mobile applications and AI development, leveraging cross-platform technologies for seamless user experiences.
- Streamlined web application/mobile application performance and scalability by efficiently managing AWS infrastructure, including deployment pipelines and cloud resource optimization.

Aerosimple.....
Software Engineer Aug 2023 – Oct 2024, Vizag, India

- Directed a team of developers to architect and implement software solutions tailored to meet complex client requirements.
- Engineered responsive and intuitive web interfaces using React.js, aligning with modern UI/UX best practices.
- Partnered with UI/UX designers to translate wireframes and mockups into dynamic, production-ready web applications.
- Developed robust RESTful APIs, integrating seamlessly with front-end frameworks to deliver end-to-end functionality.
- Maintained high code quality by implementing automated unit testing, code reviews, and version control best practices using Git.

PROJECTS

AI-Powered Job Portals & Recruitment Solutions.....
(Nov 2024 – Present | KREEYAA)
Built two full-stack platforms: a blue-collar job solution with multi-language video job descriptions, and an AI-driven recruitment portal with semantic matching, self-assessment, and automated interviews. Both feature React.js frontends, Node.js/FastAPI backends, MongoDB, and OpenAI integration. Deployed from concept to production, including the live platform at <http://jobs.qualifyde.com>.

Tanggo – NFC-Powered Music Sharing Platform.....
(Apr 2025 – Present | KREEYAA)
Developed a cross-platform app that plays music by scanning NFC-enabled discs. Built a React Native mobile app for NFC reading and music retrieval, a React.js admin portal for content management, and a Node.js/MongoDB backend for NFC mappings, metadata, and real-time sync. Optimised performance and database queries for fast playback.

Aerosimple: Airport Management Software

Engineered a comprehensive airport management solution used by 100+ airports worldwide, including top-tier airports like Washington Dulles International and Denver International. The platform digitizes airport workflows, streamlining operations and enhancing overall efficiency for airport management teams. Checkout here: <https://us.aerosimple.com>

Avyaan Company Website

(Avyaan Management)

Led the development of the company's website, designing visually appealing pages with custom templates and writing persuasive content that conveys the brand's mission and values. Enhanced web development and content creation skills.

Break Management Tool

(Avyaan Management)

A Node.js/Electron.js desktop app for break scheduling and analytics with SQL data storage. Features API integration, responsive HTML/CSS UI, cross-platform support, and secure data management.

Contextify AI – Contextual Search Web App & Chrome Extension

(Personal Project)

An AI-powered web app and Chrome extension that lets users search and understand any text or image from a webpage with a right-click. Built with MERN stack, GPT, Plasmo JS, Tailwind, Stripe payments, and OAuth 2.0. Includes token-based search, speech output, social sharing, and a support portal.

DeepJung – Jungian Dream Interpreter Chatbot

(Personal Project)

A full-stack MERN chatbot that analyses dreams using Jungian psychology. Features a character named Morpheus guiding users through dream decoding, an attractive landing page, secure encrypted interactions, and a responsive React frontend with Tailwind.

Assistly – Meeting Recorder & Task Automator

(Personal Project)

A mobile application that records meetings, generates personalized AI-powered meeting notes, and automatically creates task assignments for individuals or teams based on the analysis of the conversation. Streamlines post-meeting workflows and improves team productivity.

COMPETENCIES

Languages	Python, JavaScript, Data Structures and Algorithm.
Front End	HTML, CSS, JavaScript, React, Tailwind.
Mobile	Ionic and React Native.
Back End	FastAPI, Node, Express, Sequelize, Mongoose
DBMS	SQL, NoSQL
DevOps	Version Control, AWS
AI	Lang Chain, OpenAI, GenAI, LLMs, ML/DL/CV.

EDUCATION

NRI Institute Of Information Science and Technology Bhopal, India

B.Tech – Computer Science

GPA: 8.6/10.00
